Filtrete Ultra Clean
Air Purifier

For the air you breathe

Better By Design

Compared to other brands of air purifiers, Filtrete™ Air Purifiers offer:

Quiet Operation—Enjoy cleaner air... in peace and quiet.

High Dust and Allergen Capture Rates—Advanced Filtrete filtration technology allows our air purifiers to capture airborne particles and allergens, like pollen, mold and dust mite debris.

More Air Circulation—Effectively circulates and cleans the air in rooms 150 sq. ft. to 360 sq. ft. (see package for details). (As much as 13x more effective than the leading brand's tower unit.)

Filter Change Indicator—Helps maximize efficiency and takes the guesswork out of changing the filter.

Streamlined and Stylish Design—Designed to blend with any décor. Perfect for home or office.

A new Filtrete air purifier is one more way to help improve the air you breathe.

Filtrete™ Ultra Clean Air Purifier

A new Filtrete air purifier is one more way to improve the air you breathe—especially compared to bulky and noisy HEPA models.

And although they are quite stylish, the real beauty is how well Filtrete air purifiers help clean your indoor air.

- Quiet operation
- 25-30% more air circulation
- 35-41% higher pollen capture rate
- Filter change indicator
- 3 speed fan
