DB Series™ Media Retainer Frames

Top Three Reasons to Use DB Series Media Retainer Frames...

- They're Economical
- They're Durable
- They're Versatile

Works great with our DB Series Media

Applications

Media retainer frames have been used for years in commercial and industrial settings as part of an effective filtration system. Combined with a variety of media options (such as with our DB Series media) retainer frames offer flexibility, durability, and economy. Since these frames are made of galvanealed metal, they should provide years of service. Various sizes can be combined or custom frames can be made to fit any filter housing. Your filter change people will appreciate the ease of transporting replacement media pads vs. carrying cases of filters to and from filter rooms or roof top units.

Standard Features and Options:

Frames	Standard 24 Gauge Galvanealed on 1" and 2" Frames Optional 24 Gauge Aluminized on 1" and 2" Frames
Backing	Standard .020" thick aluminized expanded steel backing Optional 16 gauge 1" x 1" welded wire backing
Gates	Standard 10 gauge galvanized steel gates (gate design may vary from that shown above)

Prices and specifications are subject to change without notice. All sales are made subject to the terms and conditions contained in the Filtera, Statement of Business Policy, as revised from time to time, a current copy of which is available upon request.
